# Welcome to the Breeder's Award Program of the Brooklyn Aquarium Society

**T**hrough the BAP, we measure our advancement as aquarists as we gain the necessary knowledge and skill to allow the species we keep to reproduce.

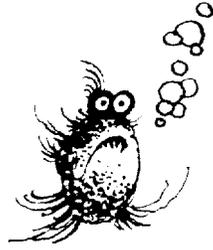

Our purposes are to encourage more participation among the members of our club, to recognize outstanding achievements, and to share knowledge of breeding techniques.

This is a noncompetitive program which recognizes all members equally according to their ability and willingness to experiment, without regard to the size of setup or any time limits. All points earned are cumulative over an indefinite period of time. 

## **POINTS & AWARDS**

Every time you spawn a fish, you earn points according to our point classification list. As you accumulate points you earn:

<u><b>Title</b></u>	<u><b>Amount of Points</b></u>
<b>Hobbyist</b>	25 points
<b>Breeder</b> At least 20 points must be from the 10, 15 or 20 point category.	50 points
<b>Advanced Breeder</b> At least 40 points must be from the 15, or 20 point category.	100 points
<b>Master Breeder</b> At least 30 points must be from each of the 5, 10, 15 point categories, 40 points must be from a 20 point category. The remaining points could be obtained from any category.	300 points
<b>Grand Master Breeder</b>	500 points
<b>Advanced Grand Master Breeder</b> 60 points must be from 5, 10, 15 point category and 80 points must be from a 20 point category.	750 points
<b>Senior Grand Master Breeder</b> 80 points must be from 5, 10, 15 point category and 100 points must be from 20 point category.	1,000 points
<b>Premier Breeder</b>	1,500 points
<b>Senior Premier Breeder</b>	2,000 points
<b>Grand Poobah Yoda Breeder</b>	4,000 points

## **ADDITIONAL POINTS ARE GIVEN**

- If a breeder elects to write an original article on his spawn or plant propagation, with references, an additional 5 points will be awarded.
- 1st Time Spawn for a fish species (for B.A.S.) will receive an additional 5 points in addition to the normal point value, for any species. If a fish has been reclassified under a different scientific name, it will not count as a new species or as a 1st time spawn, unless it has not been bred under its former name. An additional 10 points will be given with an original article (with references) of 300 words or more, about the spawn. The time frame for this article will be three (3) months from the date of the spawn.

## **AWARDS**

<b>25 – 100 points</b>	[Hobbyist, Breeder, Advanced Breeder] – certificates
<b>300 points</b>	[Master Breeder] – 5 X 7 plaque or equivalent
<b>500 points</b>	[Grand Master Breeder] – 8 X 10 plaque or equivalent
<b>750 points</b>	[Advanced Grand Master Breeder] – decorative 8 X 10 plaque or equivalent
<b>1,000 points</b>	[Senior Grand Master Breeder] – large plaque/ trophy or equivalent
<b>1,500 points</b>	[Premier Breeder] – larger trophy or equivalent
<b>2,000 points</b>	[Senior Premier Breeder] – largest trophy or equivalent
<b>4,000 points</b>	[Grand Poobah Yoda Breeder] – huge trophy

## **SPECIALTY SPECIES PROGRAM & MAINTAINING SPECIES PROGRAM**

- |   |  |
|---|--|
| • Anabantoids                           | 6 species  |
| • Brackish Water                        | 3 species  |
| • Catfish                               | 5 species (1 species must be from other than Corydoras, Asidorus, Brochis) |
| • Characins                             | 6 species  |
| • Cichlids - New World (American)       | 12 species   |
| • Cichlids - Old World (African/ Asian) | 12 species (no more than 5 mouth brooders)                                 |
| • Cyprinids                             | 10 species   |
| • Killifish                             | 7 species (at least 2 species must be annuals)                             |
| • Livebearers                           | 8 species  |
| • Marine fish                           | 3 species (only true marine varieties)                                     |
| • Marine invertebrates & corals         | 7 species (2 species other than snails)                                    |

## **SPECIALTY PROGRAM AWARDS**

**Specialty Species Award** - Certificates for single species group

**Senior Specialist Award** – plaque or equivalent for achieving 4 different species groups \*

**Expert Specialist Award** – plaque or equivalent for achieving 7 different species groups\*

\* With the exception of invertebrates for Senior and Expert Specialist Award

## **HORTICULTURAL AWARD PROGRAM**

**Plants reproduced must conform with the following definition of an aquatic plant:**

• An aquatic plant is one which, in the wild or natural state, can be found in the submerged form, or floating, as a normal occurrence at some time during the course of any one complete season. The objectives of the Horticultural Award Program are:

- To recognize outstanding achievement in growing and propagating aquatic plants.
- To gather knowledge and information about aquatic plants and their environment.
- To identify new plants.

When a plant reproduces, you earn points according to our point classification list.

As you accumulate points, you earn:

<b><u>Title</u></b>	<b><u>Amount of Points</u></b>
<b>Beginner Aquatic Horticulturist</b>	<b>25 points</b>
<b>Aquatic Horticulturist</b> At least 20 points must be from the 10, 15 or 20 point category	<b>50 points</b>
<b>Senior Aquatic Horticulturist</b> At least 40 points must be from the 15 or 20 point category	<b>100 points</b>
<b>Expert Aquatic Horticulturist</b> At least 30 points must be from each of the 5, 10, 15 point categories; a minimum of 40 points must be from a 20 point category. The remaining points can be from any category.	<b>300 points</b>
<b>Master Aquatic Horticulturist</b>	<b>500 points</b>
<b>Grand Master Aquatic Horticulturist</b> 60 points must be from 5, 10, 15 point category and 80 points must be from a 20 point category.	<b>750 points</b>
<b>Senior Grand Master Aquatic Horticulturist</b> 80 points must be from 5, 10, 15 point category and 100 points must be from 20 point category.	<b>1,000 points</b>
<b>Premier Aquatic Horticulturist</b>	<b>1,500 points</b>
<b>Senior Premier Aquatic Horticulturist</b>	<b>2,000 points</b>

## **ADDITIONAL POINTS ARE GIVEN**

- If a breeder elects to write an original article on his plant propagation, with references, an additional 5 points will be awarded. The time frame for this article will be three (3) months from the date of the spawn.
- Extra points will be awarded for plants that flower, equal to the point value of plant.
- Extra points will be awarded for plants reproduced sexually, equal to the point value to which the plant belongs.

## **AWARDS**

<b>25 – 100 points</b>	[Beginner, Aquatic and Senior Aquatic Horticulturist] – certificates
<b>300 points</b>	[Expert Aquatic Horticulturist] – 5 X 7 plaque or equivalent
<b>500 points</b>	[Master Aquatic Horticulturist] – 8 X 10 plaque or equivalent
<b>750 points</b>	[Grand Master Aquatic Horticulturist] – decorative 8 X 10 plaque or equivalent
<b>1,000 points</b>	[Senior Grand Master Aquatic Horticulturist]– plaque or trophy or equivalent
<b>1,500 points</b>	[Premier Aquatic Horticulturist] - larger plaque/ trophy or equivalent
<b>2,000 points</b>	[Senior Premier Aquatic Horticulturist] – unique plaque/ trophy or equivalent

## **CORAL AWARD PROGRAM**

**Corals propagated/reproduced must conform with the following definition of a marine coral:**

- A hard coral is the hard skeleton secreted by certain tiny sea animals, such skeletons collectively forming reefs, islands, etc. A soft coral is the spreading by propagation of live, simple celled, marine animals that share the same habitat, forming colonies or groups of soft coral, in the oceans of the world.

**The objectives of the Coral Award Program are:**

- To recognize outstanding achievement in growing and propagating corals.
- To gather knowledge and information about both hard and soft corals and their environment.
- To identify new corals.

Every time your coral reproduces, you earn points according to our point classification list. As you accumulate points, you earn:

<b><u>Title</u></b>	<b><u>Amount of Points</u></b>
<b>Beginner Coral Propagator</b>	<b>25 points</b>
<b>Coral Propagator</b>	<b>50 points</b>
<b>Senior Coral Propagator</b>	<b>100 points</b>
<b>Expert Coral Propagator</b>	<b>300 points</b>
<b>Master Coral Propagator</b>	<b>500 points</b>
<b>Grand Master Coral Propagator</b>	<b>750 points</b>
<b>Senior Grand Master Coral Propagator</b>	<b>1000 points</b>

## **ADDITIONAL POINTS ARE GIVEN**

- If a breeder elects to write an original article on his coral propagation, with references, an additional 5 points will be awarded. The time frame for this article will be three (3) months from the date of the propagation.

## **AWARDS**

- 25 – 100 points** [Beginner, Coral Propagator and Senior Coral Propagator] – certificates
- 300 points** [Expert Coral Propagator] – 5 X 7 plaque or equivalent
- 500 points** [Master Coral Propagator] – 8 X 10 plaque or equivalent
- 750 points** [Grand Master Coral Propagator] – decorative 8 X 10 plaque or equivalent
- 1,000 points** [Senior Grand Master Coral Propagator] – large plaque or trophy or equivalent

## **BREEDER OF THE YEAR AWARD**

- An annual award that is presented to the hobbyist who has bred the most fish, plants and/or coral propagation and, in the view of the BAP committee, has demonstrated a devotion to the expanding of the species through generosity, patience and support of the club. Examples are donating fry to other members, help and support to other breeders and support to the BAS. The BAP chairperson reserves the right not to present this award if it is believed that no one person has shown the qualities and characteristics that set them apart from other hobbyists.

## **CLAIMING POINTS**

- When you have spawned your fish, they must be “witnessed”; that is, a member of the Breeder Award Program will come to your home to inspect the fry and parents and verify the species within 7 days of the time they become free swimming. A committee member will revisit to verify the fry are alive 60 days after free swimming or fry may be brought to a club meeting after 60 days.
- A minimum of six (6) fry will be considered a spawn, if maintained for 60 days. Special consideration will be given to fish that are less prolific and to Junior members, upon request of the breeder to the committee, to waive the six (6) fish minimum.
- Marine fish will be 20 point fish if the fry are free swimming for 30 days.
- Corals and plants – a committee member must be notified immediately and the committee member must inspect the “cutting” within 7 days. The “cutting” must be re-visited to determine reasonable growth within 60 days of original viewing. Floating plants; by doubling the amount; bunch plants, by doubling the number of rooted growing stems; runner or divided plants must have one healthy plant capable of living independently. Sexual reproduction: the flowerings must be identified in full bloom attached to the parent plant. For seeded plants, there must be a healthy seedling sufficiently developed to be identified as the offspring of the parent plant.
- Plants must have a viable offspring or grow offshoots that develop root systems. Acceptable methods are by cuttings, offshoots, runners, or plantlets that develop their own root systems and can survive on their own, flowering or seed production, and by flower pollination from the members own plant.
- All requirements must be completed within 4 months after a BAP committee person witnessed breeding. If not completed, the spawn is not eligible for the BAP.
- You must be a member in good standing with BAS.
- Points may be obtained **only once per species** of fish/coral invertebrate/plant. If a fish has been reclassified under a different scientific name, it will **not count** as a new species. Color variations do not count as a separate species. Different Latin name counts as a different species. Examples are Discus [*Symphysodon aequifasciatus* “Pigeon Blood” and *Symphysodon aequifasciatus* “Gold Dragon” only one counts. *Corydoras metae* and *Corydoras melini* are different species (different last names), thus both count.
- Points may be awarded to families or couples and to individuals, but **not** to both.
- It is the breeder’s responsibility to complete all necessary forms, verify that the forms are submitted, the proper points are recorded and that the spawns are verified.
- Partnerships on points or family membership in Breeders Award Program: the points will **only** be awarded to the family group or to one (1) member.

## **ASSIGNING & CHALLENGING POINTS**

- Species not listed that an aquarist is planning to spawn should be brought to the Chairperson's attention. The Chairperson will present the specifics to the committee for discussion. The committee, by majority vote, will assign points.
- It is recognized that new discoveries, new importations of fish, published documents, etc. can all change the value of breeding a specific species. Points may therefore be reviewed and changed periodically by the committee, by majority vote, and the findings and changes will be publicized in the club journal "*Aquatica*."
- If the number of points is changed on a species, this point value will go into effect immediately. When points are reclassified, the points shall not be applied to previously earned points.
- Breeder Award Program year will start in September and end at July Board meeting. Spawns for July and August will be recognized in September.
- If a member has a lapse in membership, the former club member's points will be reinstated depending on the availability of records. During the period of time the person was not a member, those spawns will **not** count for points; points will start again upon the person becoming a member in good standing.
- The BAP committee has the right to extend any time and/or date limits.

### **THE ASSIGNING OF POINTS RATIONALE IS AS FOLLOWS:**

- 1) Fish, coral invertebrate, plant type
- 2) Water chemistry, lighting, temperature
- 3) Feeding requirements
- 4) Difficulty in spawning
- 5) Difficulty in raising fry

**5 points** - species that can basically breed over a wide range of conditions, all by themselves. Examples: guppy and platy.

**10 points** - species that can be bred easily, given specific conditions, which are not too exacting. Examples: barbs which breed easily when conditioned properly, zebras when conditioned and given low water level and a marble bottomed tank or African mbuna which breed easily given alkaline water, good food and some measure of protection against aggression.

**15 points** - those species which may present moderate problems in one or more of the following areas: aggressive behavior, water chemistry, specific diet requirements, mate selection or sexing, poor physical stamina or disease resistance, special tank setup requirements, special care for fry. Example: Angelfish- may present a sexing problem, have an aggressive nature, and can present a problem providing proper brood care.

**20 points** - those fish that have not been bred, bred only very rarely, or are very difficult to breed based on the severity of the problems mentioned above. Examples: Black Ghost fish, Neons, and all marine species.

## **BREEDERS AWARD COMMITTEE**

- The Breeders Award Committee will consist of a chairperson and an even number of other members. The chairperson and the members shall be approved and appointed by the Board of Directors.
- The duties of the committee shall be to witness spawning and cuttings, keep official records and point totals, report to the Board when necessary, publicize the activities of the committee and those persons spawning fish in the club journal, order certificates and awards as needed, and make the necessary presentations at meetings.
- As soon as your fish spawn, plant or coral reproduce call/email:  
Committee Chairperson **Joe Graffagnino** (718) 238-1792

# NOTES

Educating Aquarists  
Since 1911

## Acknowledgements

**W**e must thank the following persons and groups for their direct and indirect help in the creation, shaping and completion of this manual. We believe that this is the first manual to address all areas of the aquatic hobbyist's pursuits and pleasures: freshwater fish, marine fish, corals, invertebrates and plants. It is hoped that both individuals and clubs will use and share this manual for the promotion of breeding and propagation of aquatic life in their personal environments.

### PERSONAL THANKS GO TO:
