THE PRESIDENT'S MESSAGE

March is a warm month for us and it became sizzling hot when **Tony Vargas** came in to be our guest speaker. As always, Tony provides a fantastic presentation to our marine loving and freshwater members.

Tony's topic for the evening was **"Successful Reef Aquariums Around The World & How They Got That Way."** Tony provided dazzling pictures and phenomenal video clips of individuals' giant aquariums and the audience ate it up. Tony has a new book out entitled **"The Coral Reef Aquarium: From Inception to Completion."**

Those who purchased the book through our website received a nice discount. Tony had fun autographing the book for our attendees. In case you weren't aware, Tony did his first presentation at BAS, back in the 80's. Tony hung around with a great group of guys that had gotten into salt water fish and corals and today are leaders in that arena. Are these names familiar- **Joe Yaiullo, Greg Schiemer, Julian Sprung?** If memory is correct, I think the majority of them started their speaker presentations at the Brooklyn Aquarium Society.

April will bring in a great freshwater breeder, probably the greatest freshwater fish breeder ever – **Larry Jinks**. Larry has bred all species of tropical freshwater fish and holds the record in Brooklyn and North Jersey for the most first time spawns in the respective clubs. Larry moved to North Carolina last year and maintained his passion for breeding fish by creating a fully automated fish room. Needless to say, Larry's topic for the evening will be **"Creating My Fish Room."** So come on down and meet with

us on April 13 at 7:30 PM. As always, there is free parking and free refreshments.

We will be planning a bus trip to Long Island Aquarium & Exhibition Center, Riverhead, NY. We are looking at Saturday July 28, 2012. Anyone interested in attending, please let me know at the April event.

I am asking for your help and support. If you want to see different topics offered, please let me know. The elected officials of the Brooklyn Aquarium Society are here to serve YOU! Please let us know what you want and why. It would be helpful to everyone. It is important that you visit and patronize our sponsors. It goes full circle: by helping them, they are also helping you as hobbyists and everyone is helping the Brooklyn Aquarium Society; so help us, help you!

For more info please call our BAS Hotline at (718) 837-4455, or visit our modern website at **WWW.BROOKLYNAQUARIUMSOCIETY.ORG**.

On a more personal note - Any member who desires to attend a Board meeting, which are held at the Education Center of the New York Aquarium on the 1st Friday of the month, please notify me at (718) 238-1792 by the Tuesday previous to the meeting.

THIS MONTH'S SPEAKER

Larry Jinks

Larry Jinks joined NJAS and the organized hobby in 1994. He raised and bred tropical fish as a youth, but stopped for a track and field career in college. After earning a bachelor's degree in biology at Rutgers College and a master's in biology from Montclair State, he embarked on a 37 year career as a high school biology teacher and track coach. After retiring, Larry and his wife, Joanne, followed their children and grandchildren south and built a new home (with a new fish room) in Wake Forest, NC.

Larry has been active in the BAP programs at North Jersey Aquarium Society, Jersey Shore Aquarium Society, Brooklyn Aquarium Society and the American Livebearer Association and is currently an officer in the Raleigh Aquarium Society. He has received BAP credit for over 300 species of fish and has been to fish shows in eight different states, winning Best of Show in four states. Now a full time grandpa, Larry still enjoys attending fish conventions, working in his new fish room and trading fish with other hobbyists.

At this event, Larry will discuss creating his new state of the art fish room in his new home in Wake Forest, NC. If you're contemplating building a fish room or updating your present fish room, this is a meeting you should attend. Larry has developed some really interesting and time saving ways of water changes plus other creative ways to make a fish room easier to manage. Bring a pad and pencil to take notes.

All BAS meetings begin at 7:30pm.

No members, other than those donating their help setting up or items for the auction, will be allowed in before that time.

BAS 100TH ANNIVERSARY COMMEMORATIVE CLOISSONNÉ ENAMEL KEY CHAIN

To commemorate our 100th year of Educating Aquarist we have created a handsome limited edition metal cloisonné enamel key chain pictured at the right. It has our present logo symbol on one side and our original logo on the other side. The key chain disk is enameled in our official colors; blue and gold, and is 1 1/2" in size.

There's a limited supply of these commemorative key chains and once they are gone...they are gone! We're sure they will become aquatic collector items.

Show your support for your Society and as a reminder that you belong to the oldest functioning general aquarium Society in America. 1911 to 2011. Not only that, but it's great for holding all your keys.

For collectors of aquatic memorabilia, each key chain comes in its own clear plastic flip top display box. The key chain rests on a foam pad so it can be kept in mint condition.

At the low price of **only \$8** each they show your support for your Society.

Check them out at the November Event. I know once you see it, you'll want one.

WE NEED MEMBERS TO JOIN THE BOARD AND HELP RUN THE SOCIETY!

Our Treasurer, **Denise Hershkowitz**, and her husband **Stu**, Exchange Editor, will be moving to Florida's sunshine soon and we need members to step up and handle these essential jobs. We also need a member to fill the post of Corresponding Secretary. This important position entails handling all external correspondence, soliciting donations, obtaining ads for our online publications, handling other Board and Society business.

Being a Board member is a great way to meet other hobbyists and speakers. If you're interested, please contact me;

Joe Graffagnino at 917 922-5108, and I will fill you in on the offices.

Guys...this is not rocket science and there are great personal rewards to those who help guide the Society for its next 100 years of Educating Aquarists. Hope to hear from some of you soon!

Changing the Chemistry of Earth's Oceans

Editorial NY Times March 9, 2012

The oceans have always served as a sink for carbon dioxide, but the burning of fossil fuels since the beginning of the industrial revolution, especially over the last 40 years, has given them more than they can safely absorb. The result is acidification — a change in the chemical balance that threatens the oceans' web of life.

In earth's history, there have been many episodes of acidification, mainly from prolonged volcanic eruptions. According to a new research review by paleoceanographers at Columbia University, published in *Science*, the oceans may be turning acid far faster than at any time in the past 300 million years.

Changing something as fundamental as the pH of seawater — a measurement of how acid or alkaline it is — has profound effects. In-

creased acidity attacks the shells of shellfish and the skeletal foundation of corals, dissolving the calcium carbonate they're made of. Coral reefs are among the most diverse ecosystems on the planet. Ocean acidification threatens the corals and every other species that makes its living on the reefs.

The authors tried to determine which past acidification events offer the best comparison to what is happening now. The closest analogies are catastrophic events, often associated with intense volcanic activity resulting in major extinctions. The difference is that those events covered thousands of years. We have acidified the oceans in a matter of decades, with no signs that we have the political will to slow, much less halt, the process.

TIP OF THE MONTH

Last Minute Fry Saving Egg Yolk Drop Soup

John Todaro - BAS
Scrumptious Meals & Live Food Treats 11/2007

This is a really high protein recipe that should put weight on fry fast. It's also very easy and fast to make.

I've been using this

recipe since I was a teenager (more years ago than I like to think about).

If your fish suddenly have spawned and you now have a tank full of hungry fry and you have nothing in the pantry to feed them... Quick -- Start boiling a pot of water. Get an egg from the fridge and boil it!

If you can't memorize this recipe (Duh!) you should tape on your fridge door.

It's a fry lifesaver!

INGREDIENTS:

1 Hard boiled egg & pot of boiling water.

YOU WILL ALSO NEED:

1 clean handkerchief.
 1 small plastic container with cover and half filled with water.
 1 eye dropper.

PREPARATION: Boil some water and drop in the egg, boil about 20 minutes until it's hard boiled. Cool the egg either in cool water or place it in a bowl of ice cubes. When cool remove the yolk and place it in the center of the handkerchief or other clean cloth. Fold the hankerchief so as to screw the cloth tightly and with your fingers mash the yolk and force it through the cloth, dipping or scraping the mashed egg into the container of water, force all the yolk through the cloth (there will always be some left over).

FEEDING: Use the eyedropper, to feed the fry, no more than they can eat in a couple of minutes. Feeding small meals throughout the day is better than one big meal. Uneaten egg yolk can foul the water quickly and you can say goodbye to your fry. You can refrigerate the mixture for a few days. If it starts to smell (rotten egg smell), discard the mixture and boil another egg.

NEW WARDLEY ADVANCED NUTRITION™
Depend on Wardley. Caring for fish since 1950.

BETTER NUTRITION
Wardley's Perfect Protein™ formula is
the first fish food designed to meet
the amino acid requirements of fish to
support their growth and good health.
Amino acid content determines a food's
quality, not the percentage of protein.
